

## Second quarter Artist Statement

For this term artist statement I chose my shattered image. The images touches three parts of the paper and that is one of the rules of three. My negative spaces are the shaded part which is the black part. My positive spaces are the white space or the frog. My picture world was big enough to fit the drawing and I use all of the space accurately. What the make this picture pop is the positive space because when you pick up this drawing your eye go straight to the frog because it pop out well.

This term has very fun and I had lots of fun drawing and doing art. I think the shattered images were one of the hardest project that we have done so far because of the shading, which was fun at the beginning but then your hands get tired and but once your done with them they look awesome. Shading is one of my least favorite things in art. I can't wait for the next project. I hope to improve on my drawing skill and everything so I can become good.
